

CJ-H-250ZA Handset

Customer Specific:

The CJ-H-250ZA is custom made to meet the requirements as an audio accessory for the South African Armed Forces.

Proven Rugged Design:

Each handset uses an already proven design incorporating a polycarbonate glass compound housing to endure vibration and harsh environments.

Reliability:

Push-to-Talk (PTT) Switch offers quiet operation during make / break sequence and a molded strain relief products added reliability.

Ergonomic:

The handsets are lightweight and ergonomic, slim at the earphone to fit underneath a tactical combat helmet. The handset has a molded clothing clip for easy attachment to the lapel or helmet strap.

Special PTT and Cover Plate Design:

The PTT is designed with a switch bezel assembly and wiring cover plate made so that there are no exterior metal parts to prevent RF burn.
